

Coordination Solution

Coordination within a company is often complicated, but it doesn't need to cause headaches. The most effective coordination solutions are tailored to match the organisation's size, focus and objectives; and that's exactly what we can do for you. Onca Technologies offers a number of tools that can be put in place to increase efficiency and maximise productivity, all through a live coordination system. Whether that means providing a visual and clear personnel rota for a small number of employees, managing projects, or tracking thousands of assets in a live register with automated updates, the end goal is up to you.

Key Benefits

- Access company information from any browser, smartphone or tablet
- Familiar interface so employees can get started quickly
- Live system minimises the need for version control
- Collaborate simply with colleagues regardless of location
- Simple control measures allow specific access rights
- An informative and visual way of working means all users can get involved
- Get alerts and notifications to provide simple status updates
- Adaptable to changes in the organisation

Onca Technologies' Coordination Solution adds power to your processes to help you manage your work, organise and collaborate with others, automate workflows, provide progress overviews, and much more. This enables you and your team to easily view, manage and communicate more effectively, thereby improving productivity and efficiency.

If you or your organisation is currently looking for a more efficient way to manage projects or company processes, then get in touch with Onca Technologies to discuss the solution in more detail today.
